

Rizhao Zhengjia Plastic Co., Ltd.

Rizhao Zhengjia Plastic Co., Ltd. was established in 2016 through the upgrading and development of Juxian Yushan Plastic Products Factory. Its team has been deeply engaged in the plastic products industry since 2006. With a factory building area of 27,000 square meters, the company is a modern manufacturing enterprise integrating R&D, production and sales of plastic products. Relying on excellent product quality and attentive full-process service, it has built a good reputation in the industry and won wide recognition from new and existing customers.

The company mainly operates two core categories of plastic products: injection molding and blow molding. Its injection molding products mainly include catering supporting products such as plastic takeaway containers, sauce cups, milk tea cups, fruit buckets, in-mold labeling takeaway containers, and disposable cutlery including knives, forks and spoons for aviation use, supported by more than 80 professional production lines. Blow molding products cover packaging and daily-use products such as plastic packaging bags, garbage bags and disposable gloves, equipped with more than 40 sets of blow molding and bag-making production lines. The products are widely used in various scenarios including catering packaging, fresh food storage and general daily packaging, fully meeting the diversified needs of the market. Since its establishment, the company has been market-oriented, continuously promoting capacity upgrading and equipment renewal. It has now formed a large-scale production capacity for plastic products of various specifications and types, capable of efficiently undertaking customers' bulk customization and regular procurement demands, while ensuring delivery efficiency and consistent product quality throughout the process.

Over the years, Zhengjia Plastic has always adhered to the corporate philosophy of "Quality First, Service-Oriented" and the entrepreneurial spirit of "Professionalism, Efficiency, Integrity and Win-Win Cooperation". Strict quality control is implemented throughout the entire process of R&D, production, quality inspection and after-sales service. Relying on a professional R&D team with 20 years of industry experience, a standardized production system and a comprehensive after-sales service system, the company carefully crafts every high-quality product, creates core value for customers with premium products and attentive services, and helps improve the quality of daily life for the public.

We sincerely welcome new and existing customers to visit our company for inspection and business negotiation, and join hands to seek common development and create a better future!
